

Appendix 5. Total number of variants identified by two alignments with different mapping criteria.

Variants identified	Used parameters	Low stringency parameters
Total variants	1195	3752
Total variants <1% frequency	591	1928
Total SNPs	476	999
Total nonsynonymous changes	6	14
Total nonsynonymous, non SNP change	3	11
False positives	1	8
